### A Complete Terminal Marking System

Sprecher + Schuh's Terminal Marking System is the ultimate solution for creating custom Marking Cards with total flexibility and fast turnaround. The system comes complete with everything required to plot your own marking tags (except a Windows' based PC). Two or four Marking Cards can be plotted at a time. That's enough tags to professionally label 400 terminals in only minutes.

Unlimited jobs can be input and stored for future plotting using Sprecher + Schuh's new EK Vario Sign software, which is very intuitive and easy to learn.

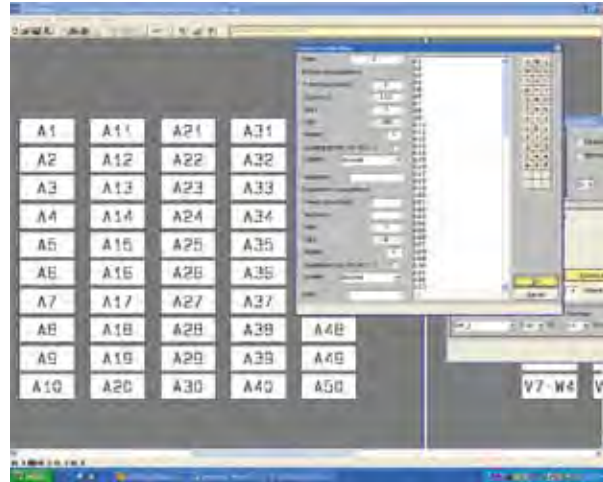

EK-Team Vario Sign software is part of Sprecher+Schuh's complete terminal marking system. This powerful tool is a great asset to Sprecher+Schuh's V7 series that offers a variety of screw-type and screwless terminal options.

# VarioSign Plotter Software

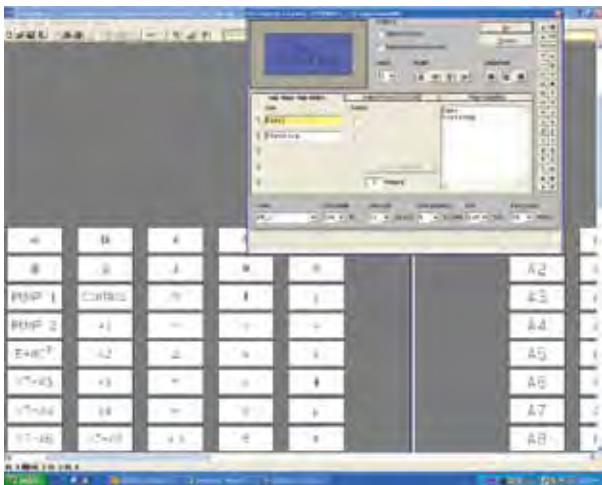

## Flexibility

Our new EK Vario Sign software allows you to design tags for two or four Marking Cards at a time. The screen looks exactly like the plotting surface on the Terminal Marking System.

## Easy Customization

Zoom-in on one card at a time to input individual marking tags... you can also identify a starting tag and ending tag to “autofill” a range of numbers.

## Quick Fine Tuning

Zoom-in further for “fine tuning” of each marking tag. Adjust spacing left, right, up or down and vary type size to fill each tag with the largest possible type.

## Easy Installation

Simply and comprehensive instructions included

Ask your local representative for more information on how Sprecher + Schuh and EK-Team 's Terminal Marking software and plotting system can save you time and money!
