

Auer COMPACT30 Warning Tower Lights

Five Types of Illumination

Quick Mounting Foot Adapter

Compact Design

Two Piezo Sound Options

Piezo buzzer modules ~85 dB (A), for continuous sound, pulsing sound or continuous and pulsing sound available

Combinations up to 5 modules

LED light modules - 6 lens colors

Three types of mounting:

- Horizontal with screw or plastic foot
- Vertical with pole and metal bracket
- Pole mount with plastic foot

LED warning/steady and flashing light modules

Lenses and housings made of impact resistant polycarbonate

The supply voltage 24V AC/DC, 110/120V AC or 230/240V AC is determined by selecting the appropriate base; all light/ tone modules mounted on the base always operate with 24V operating voltage

Pole lengths 0 - 400mm, other lengths upon request

Easy electrical connection due to prewiring

Quick release aluminum tube base adapter

Compact

Pre-assembled to install

Ready to order

COMPACT30 Warning Tower Lights from the J. Auer company are the perfect compliment to Sprecher + Schuh's world class industrial control product line. All COMPACT30 are factory assembled from J. Auer and speci-

cally built to meet the customer needs. Made of high-grade impact resistant material, this 30mm space saving line is also flexible and extremely easy to install.

Series COMPACT30 from Auer

Best of class

In comparing COMPACT30 Warning Tower Lights to competitive products from manufacturers, including Patlite and many others, the COMPACT30 line offers more features, approvals and options than any other major stack light manufacturer.

Rugged construction for industrial applications

Heavy duty industrial polycarbonate is used to construct all light modules and bases for the COMPACT30 line. The entire line is UL Type 4 / 4X / 13 and IP65 approved for use indoors or outdoors. No other manufacturer of competitive product offers this extensive range of environmental approvals.

Multiple combinations of lenses, voltages and illumination types

Six lens covers are available (green, red, amber, blue, yellow and clear), more than any other major manufacturer. Light modules are offered in three different voltages including 24V AC/DC, 120V AC and 240V AC. The COMPACT30 modules are available in steady or flashing, all with built-in LED illuminations for superior brightness and long life.

*Patent pending design
saves time and allows quick
disconnection for shipping*

Introducing a Quick Release Aluminum Tube Base Adapter

The Quick Release Mounting system foot adapter is a first for the signaling industry. The Quick Release Tube Base Adapter design allows a customer to remove the warning light stack while the base remains wired and fixed to the control panel for ease of shipping to the final destination.

New sound module expands choices

In addition to the many visual alert modules available with the COMPACT30 line, a new Piezo sound module is now available. Choose either a Single Circuit continuous or pulsing tone module or an all-in-one Dual Circuit Sound Module, used in applications where two types of audible alert are required to indicate different levels of machine status. Voltages include 24V AC/DC and 120 & 240V AC.
